Python 3.7.4 latest version was installed

The image displays two side-by-side code editors. The left editor, titled 'sample.py', contains the following Python code:

```
def weather = 'rain':  
    print('Field have humidity')  
    print('No water need, Rain is enough')  
  
def main:  
    print('Water is enough')
```

The right editor, titled 'CLI Shell 3.10.2', shows the output of running the script. It displays the Python version and the message 'No water need, Rain is enough!'.
